

THE Impact Rankings Questionnaire

University: Universitas Indonesia

[1] SDG1: NO POVERTY

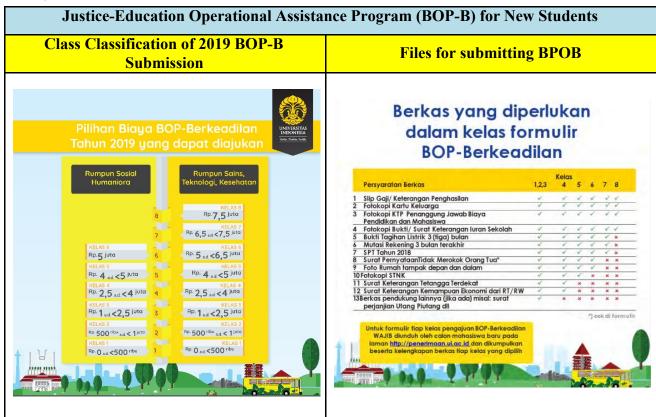

[1.3] University anti-poverty programmes

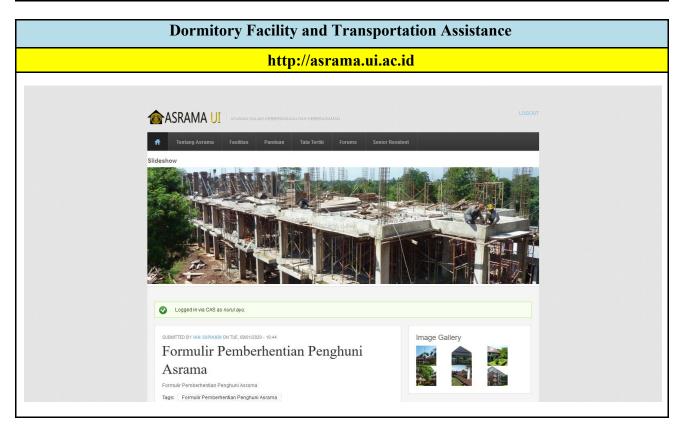

[1.3.3] Low-income student support

Transportation

Description:

Universitas Indonesia supports facilities and programs for students from low-income families to enable them to finish their studies at the university through Bidikmisi program by giving financial and supporting transportation with the yellow bus, bicycle, and scooter. Universitas Indonesia also implements a stipulation for tuition called "Justice-Education Operational Assistance Program (BOP-B)". This mechanism allows every student to pay the tuition based on their financial capability. On top of financial aid, Universitas Indonesia also supports its students with dormitory and transportation mode at the campus. UI's Dormitory comprises several buildings that can house 1,538 students with some facilities such as a canteen, ATM center, some houses of worship, and other facilities in the dormitory. UI also provides 13 buses that serve in-campus routes.
