Description of counselling center

UI Satellite Clinics Counseling services

Klinik Satelit Universitas Indonesia

UI Satellite Clinics Counseling services

The health facilities provided by university to maintain the academic health are the UI Satellite Clinics, which are located on 2 campuses, the Depok campus and the Salemba campus.

All students, staff and lecturers at the University of Indonesia will free of charge on doctor consultations, psychology consultations, dentist consultations and medicines. There are minimum of charge for laboratory facilities, emergency measures and dentist procedures, compared to similar services in private clinics around Depok.

The good news is that in mid-2018, the UI Satellite Clinic has been registered as a primary level health facility (FKTP) from the Health Insurance Implementing Agency (BPJS), so that laboratory facilities, emergency measures and dentist actions can be free of charge with a BPJS membership registered at the Clinic Satellite. Therefore, it is recommended for students, staff, and lecturers in the UI environment to move their FKTP to the UI Satellite Clinic with the health facility code number: 0138B253 which can be moved independently online via http://pcare.bpjs-k Health.go.id/pcare/index.jsp

Another good news, in the end of 2019, UI Satellites Clinic got highest accreditation from National Board of Accreditation.

The UI Satellite Clinic Counseling Service is a facility provided for UI residents (students, lecturers and employees) in maintaining mental well-being by providing psychological assistance to those who experience academic, personal and / or family problems.

The scope of health care carried out includes promotional, preventive and curative activities. Psychological assistance is provided in the form of guidance and counseling. Guidance is the provision of information (both individually and in groups with the aim that students can learn and build social relationships optimally. Counseling is the process of providing assistance to UI residents who have problems in understanding the real problem and encouraging them to find solutions to these problems. Here the counselor acts as a facilitator.

Description of the problem being handled:

- Academic problems: low GPA, concentration difficulties, reduced learning motivation, procrastination (habit of delaying work), etc.
- Personal problems: lack of confidence, feelings of pressure / stress, excessive anxiety, etc
- Family problems: divorced parents, difficulty communicating with parents, less supportive family, etc
- Problems in social relationships: embarrassment to start friendships, problems at work feeling isolated, lonely, etc.

Services:

A. Counselling practice

a. Clinic counselling:

electronic registration, Monday -Friday (08.00 AM – 16.00 PM), Depok Campus Clinic , 3rd fl.
