[6] SDG6: Clean water and sanitation

[6.5] Water in the community

[6.5.2] Promoting conscious water usage

Rector's Decree Number 1309/SK/R/UI/2020 on Water Conservation Policies in the Campus Area

Posters to Promote Water Conservation in the Campus Area

Utilization of Water-Saving Devices in UI

Celebrating World Water Day, MAPALA UI Started An Environmental Movement for Ciliwung

World Water Day Seminar, PKPU Collaborated with UI Students

"Water Counting" Program to Solve Water Scarcity in Tianyar Village, Karang Asem, Bali

Description:

Universitas Indonesia actively promotes conscious water usage on campus and in the local communities. UI keeps running programs and promotions to support water-conserving activities on campus. One of the on-going activities is promoting conscious water consumption to both Universitas Indonesia's academics and students and the people living near the campus area. To promote conscious water consumption in the campus area, UI issued and implemented Rector's Decree Number 1309/SK/R/UI/2020 in which stated that all people within the campus have to practice water-saving and utilize recycled water to fulfill water needs. Universitas Indonesia actively promotes conscious water usage on campus and in the local communities. To show support for conscious water consumption, UI encourages the local community to practice water conservation. Universitas Indonesia also celebrated World Water Day by doing several activities such as promoting water conscious behaviors to local communities through the students.

With the decree in mind, UI begins to improve and renovate the restrooms, adding automatic faucets and EcoFlush systems. Along with this equipment, posters containing instructions on how to use them for saving water are provided.

UI also has a program to promote water usage conserving in the wider community. By inviting students to participate in contributing to promote water usage with celebrating world water day, UI holds seminars to wider community for Promoting Conscious Water Usage.
