10	1906391595	Salfatika Dwi Zulhagira	HUKUM	Keterbatasan Pergerakan Kaki Ex Luka Bakar
11	1906361372	Bima Bagus Saputra	HUKUM	ROM Lengan Kiri Terbatas Post Plexus Brachialis Injury Sinistra (Lesi Plexus Brachialis)
12	1906362981	Muhammad Daviro Rifa Tampi	HUKUM	Cedera Akhla Kanan

Disabilities Scholarships and Stipends

Description :

Universitas Indonesia has accommodations policy and strategy for disabilities people in the campus environment. UI support provide facilities to transportation and shoelarschip for disabilities students.

Temporarily, there is only one car that is parked in Pusat Administrasi Universitas (University Administration Center) ini UI, Depok. This program was actually planned at the beginning of 2015 and has been started since September 2015. For now, the car is actively picking up and dropping off a student with a disability everyday. This car is a part of the Development of Disability-Friendly Facilities and Infrastructure Fulfilment Program in UI. This program consists of supply and development of disability-friendly facilities in the whole area of UI from the toilets, transportation system, pedestrians, dormitory, and buildings. Gradually, UI will be fulfilled with other accessible facilities, so UI can be an educational institution that provides a comfortable studying environment for everyone.

Another program, UI has collaborated with Trans Jakarta. The buses used by Trans Jakarta to cross and serve services on the UI campus are low deck buses, where low deck buses are more friendly to those with special needs, so UI hopes that UI academics with special needs can be served as well as the others.

Universitas Indonesia in collaboration with the Ministry of Research and Technology provides tuition assistance and cost of living assistance to 29 students with disabilities. Apart from the scholarship, Universitas Indonesia provides a free shuttle car service for students and staff who use wheelchairs on a daily basis. This car is part of the Disability-Friendly Facilities and Infrastructure Fulfillment Development program. This program consists of the provision and construction of disabled-friendly facilities throughout the campus, starting from toilets, transportation, roads, dormitories, and buildings. These facilities have been widely implemented both in lecture buildings, meeting halls, library buildings, sports facilities and or pedestrians.
