6	Other Green Areas	672,276	808,610	23.32%
Total Area		2,883,087	3,955,506	100%

Description:

Universitas Indonesia provides free public access to open green spaces such as UI forest city, Firdaus Park, and Lingkar Park near UI Library that are very crowded during the weekend.

UI has a city forest and a green area on its campus in Depok. The total green area of UI is 1,452,367 m² or 50,38% of UI Depok.

UI also has various parks with a number of plants being planted regularly, like the relatively well-known Firdaus UI Park and Lingkar Park at UI Library. These parks are open for public for free. Members of Universitas Indonesia often makes use of these parks for student discussions or other activities.

UI forest city is a natural tourism accessible to the public, especially those living around the campus. The UI forest has various natural vegetations, such as teak, meranti, coffee, rubber, and pomelia pinnata. The biodiversity of the ample forest city serves as Depok City's water absorption area as well as a research location for students.

Aside from cycling, other activities that can be done in the forest city includes jogging, fishing, or simply taking a walk while enjoying the breeze that blows through the tall trees of the forest. All recreation activities in UI forest city are free of charge, but visitors must keep the environment clean and orderly. In the future, UI plans to develop "science park" agro-tourism in UI forest city.
