

## THE Impact Rankings Questionnaire

University : Universitas Indonesia  
 Country : Indonesia  
 Web Address : [www.ui.ac.id](http://www.ui.ac.id)

[14] SDG14: Life Below Water  
 [14.2] Supporting aquatic ecosystems through education  
 [14.2.3] Overfishing (community outreach)

**The development of Minatransporter in the living fish transportation system as an effort to overcome fish distribution problems in Sumur District, Banten, to Support the Development of Minapolitan Areas**

### Description :

Universitas Indonesia has educational outreach activities for local or national communities to raise awareness about overfishing, illegal, unreported and unregulated fishing and destructive fishing practices. Universitas Indonesia through community assistance programs has put an emphasis on assisting coastal communities. For example Minatransporter in the living fish transportation system as an effort to overcome fish distribution problems in Sumur District, Banten, to Support the Development of Minapolitan Areas, this program is related to Indonesia's image as a maritime country with rich marine culture. The program carried out by the Faculty of Math and Natural Science Universitas Indonesia community service team allows information regarding the threat of environmental damage resulting from the use of cantrang technology, or other illegal methods. In addition, the program also conveyed technological breakthroughs that can help fishermen optimize their income in a sustainable way.

Marine ecosystem is an elegant balance but fragile. Therefore, it is very important to coordinate harmonious economic activities such as responsible fisheries that actually support the sustainability of the underwater environment.
