

THE Impact Rankings Questionnaire

University : Universitas Indonesia
Country : Indonesia
Web Address : www.ui.ac.id

[14] SDG14: Life Below Water
[14.5] Maintaining a local ecosystem
[14.5.5] Watershed management strategy

Universitas Indonesia (UI) and River Ciliwung Community

Description :

Universitas Indonesia has implemented a watershed management strategy based on location specific diversity of aquatic species. For example, UI has *Tridharma* Responsibility, which are education, research, and community service. One of the community services is by actively assisting communities in the society. As seen above, together with the local youth organization and *Anak Kali Ciliwung* community (KAKC) who are domiciled in Krapu Village, Tongkol, and Lodan, North Jakarta, Universitas Indonesia community service team were planning the construction of a Community Park.
