**Description :**

Universitas Indonesia (UI) offers educational programmes on ecosystems (looking at wild flora and fauna) for local or national communities. UI is a campus with an area of approximately 300 hectares. Nearly 70% of its area is green open space (RTH) and urban forests, with diverse flora and fauna some of the rare species can be found in UI area, to support the total area needs according to Law number 26 of 2007 which requires 30% of the land area to be in the form of RTH. In addition, UI is an open campus, from various circles of the general public can access the UI area. Hence, UI commits to offer educational programmes for local or national communities. In the pictures above show that UI has given education about ecosystems on the urban forests of Universitas Indonesia to Elementary School as well as Senior High School students.
