### Ul Zero Plastic

Some activities to support SDG 12 Responsible Consumption and Production

## FMIPA UI Lecturer Introduces Farmers to "Minametrik" Pond Fertilizer for an Increased Giant Tiger Prawn Productivity

## MURI Record Breaker, 8,500 UI Freshmen Built "MAKARA" from Plastic Bottle Wastes

## **Description:**

University's sustainability report is published annually (2018 and 2019). The report consists of all efforts by the university in order to achieve all SDGs. This section presents the report of the twelfth point of the SDGs, Responsible Consumption and Production, as part of the annual university's sustainability report.

This section also provides some evidence of the university's action to achieve SDG 12. As an act of service towards the public, four FMIPA UI lecturers (Mufti Petala Patria, Abinawanto, Retno Lestari, and Wisnu Wardhana) introduce "Minametrik" to giant tiger prawn farmers in Pantai Bahagia Village, Muara Gembong, Bekasi. Not only supplying the "Minametrik", they, alongside seven FMIPA UI students, also give out training and semi-intensive enterprise assistance to 30 farmers which lasts out from June to September 2020.

At the university level, Universitas Indonesia and Alumni Ties of Universitas Indonesia (ILUNI UI) cooperating with Jasa Marga did a declaration of the Ambassador of Plastic Waste Cleaning (Duta Bersihkan Sampah Plastik). Jasa Marga here is committed to implementing an environmental care program by managing plastic wastes and planting trees in highway areas to minimalize the pollution from the vehicles.
