SDG 17

Kemitraan untuk Mencapai Tujuan
Partnerships for the Goals

Kolaborasi dengan Pemerintah Lokal
Collaboration with the Local Government

UI berkolaborasi dengan Pemerintah Provinsi DKI Jakarta untuk mencapai tujuan SDG. Salah satu contoh penting adalah kerja sama Integrated Academic Health System (IAHS UI) dengan Program Jakarta Sehat. IAHSUI merupakan sebuah program kerjasama antara UI (Rumpun Ilmu Kesehatan UI dan Rumpun Sains Pendidikan) dengan hal-hal dalam pengembangan kapasitas sumber daya manusia, pendidikan, penelitian, dan pelayanan kesehatan.

Salah satu aktivitas penting di antaranya adalah webinar UI dalam Program Jakarta Sehat dalam rangka pengamatan kualitas kesehatan di DKI Jakarta, serta pengamatan mahasiswa ke Rumah Sakit Umum Daerah di DKI Jakarta. Aktivitas penting lainnya adalah AIH Joint Research Program dengan Pemerintah DKI Jakarta yang akan dibantu oleh Pemerintah DKI Jakarta.

UI collaborates with the Provincial Government of DKI Jakarta to accomplish SDG goals. One important example is the integrated collaboration between the Academic Health System of UI (AIHS UI) and the Healthy Jakarta Program. IAHSUI is an integrated system between UI (Health Sciences Cluster) and the university hospital in terms of governance in enhancing human resource capacity, education, research, and health service.

A number of important events include UI involvement in the healthy Jakarta Program in the context of improving the quality of health in DKI Jakarta, and dispatching students to the Regional General Hospital in DKI Jakarta. Another is the AIH Joint Research Program funded by the DKI Jakarta Government.

Kemitraan untuk Mencapai Tujuan
Partnerships for the Goals

Kolaborasi dengan Mitra Internasional
Collaboration with International Partners

Sebagai upaya pencapaian tujuan SDG, UI melalui FICUI juga berkolaborasi dengan sejumlah institusi internasional seperti Union for International Cancer Control (UICC) dan Association of International Academic Health Centers (AIHC). Sampai saat ini, UI memiliki program kerjasama dengan UICC dan AIHC yang meliputi berbagai aspek, seperti penelitian, pendidikan, dan pelayanan kesehatan. Dengan UICC, UI telah melakukan kolaborasi dalam berbagai aspek, terutama dalam hal penelitian onkologi medis.

UI sering terlibat dalam kegiatan UICC terutama untuk kantor regional Asia. UI menjadi jejaring dalam mediasi Indonesia untuk menjadi salah satu negara yang mendukung program Thailand untuk Semua yang merupakan kampanye UICC yang bertujuan untuk mengurangi kesenjangan dalam akses global dalam hal akses ke layanan kesehatan. Dengan UICC, UI berkolaborasi dalam berbagai aspek, terutama dalam hal penelitian onkologi medis. Universitas Indonesia juga sering terlibat dalam kegiatan UICC, terutama untuk kantor regional Asia.

As an attempt to accomplish SDG goals, FICUI collaborates with a number of international institutions such as the Union for International Cancer Control (UICC) and the Association of International Academic Health Centers (AIHC). UI is already a full member of UICC. FICUI has several programs related to cancer such as gynecological oncology, pediatric, radio-therapy, and others. With UICC, much collaboration has been carried out, especially in the area of medical oncology research.

UI is often involved in UICC events, particularly for Asian regional offices. UI provided Indonesia to become one of the countries supporting the Care for All program, a UICC campaign to reduce the gap in global equity in terms of access to cancer services.

Kerja Sama Penelitian
Research Collaboration

Dalam bidang penelitian, UI juga melakukan kolaborasi penelitian terutama dengan pemerintah. Salah satu contoh ialah penelitian pengembangan vaksin demam berdarah dan pengembangan vaksin gigitan nasional bedah. Selain itu, FICUI juga terlibat dalam tim penelitian khusus yang mengoptimalkan pengetahuan dan perilaku tentang kesehatan dalam peserta klub dan tingkat kebugaran bagi peserta di kawasan tropis.

Sebagai kontribusi terhadap status kesehatan di daerah kesehatan, FICUI melalui Academic Health System (AHS) UI telah melakukan penelitian kesehatan multisektoral bersama dengan Dinas Kesehatan Provinsi DKI Jakarta dengan topik di antaranya optimisasi LQADN pada program penelitian, perawatan antenatal, nutrisi, penyakit kardiovaskular, diabetes mellitus tipe 2, kesehatan kesehatan generik, dampak pencemaran udara pada kesehatan, penyakit alih daya, dan lainnya.

Untuk meningkatkan kesadaran publik tentang masalah kesehatan saat ini, FICUI membuat berbagai forum diskusi dengan dan publik, seperti diskusi dengan tenaga profesional yang aktif bagi para profesional kesehatan di Indonesia, diskusi publik tentang jaminan kesehatan nasional (JKN) dan Badan Penyelenggara Jaminan Sosial (BPJS) dan lainnya UI juga untuk calon peserta penelitian di klinik.

UI also conducts research collaborations with the government. The development of Dengue fever vaccines and transubstituted national generic vaccines are some examples.

FICUI is also a member of a special research team that explore high participants' knowledge and perceptions on mortality and tropical workers' fitness level.

To contribute to the health status in the surrounding area, FICUI through the UI Academic Health System (AHS) has conducted multisectoral health research in collaboration with the DKI Jakarta Province Health Office covering topics of optimization of the first, second, and third days of the program, antenatal care, nutrition, cardiovascular diseases, type 2 diabetes mellitus, generic health services, the impact of air pollution on health, occupational diseases, and others.

To raise public awareness on current health issues, FICUI has organized various scientific and public discussion forums, such as dialogues with the theme of equitable health professional distribution in Indonesia, public discussions on National Health Insurance (JKN) and the Social Security Organizing Agency (BPJS), as well as clinical trial courses for prospective clinical research.

Kerja Sama UI dan Transjakarta: Integrasi Transportasi Ramah Lingkungan

Oleh Wanda Ayu | Tanggal Kamis, Juli 11 th, 2019 | No Comments

MoU (*Memorandum of Understanding*) atau nota kesepahaman kerja sama antara pihak Universitas Indonesia (UI) dengan PT Transjakarta resmi ditandatangani pada Selasa (09/07/2019) di Ruang Rapat A, Pusat Administrasi Universitas Indonesia (PAUI) atau Gedung Rektorat UI. Acara ini merupakan langkah Universitas Indonesia dalam mengurangi dampak polusi udara yang semakin mengkhawatirkan, terutama di wilayah kampus.

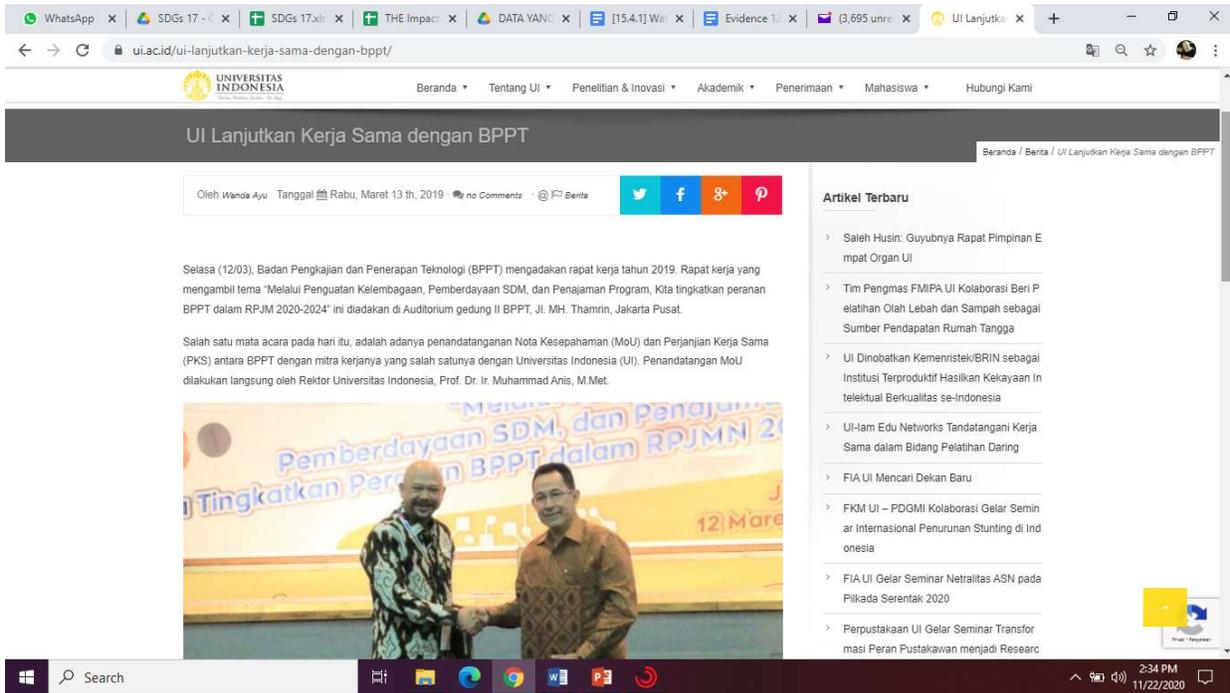

Mengawali acara penandatanganan nota kesepahaman kerja sama kali ini, Rektor UI Prof. Dr. Ir. Muhammad Anis, M. Met, memberikan beberapa kata sambutan. Menurut beliau, wilayah kampus UI cukup luas termasuk 1/3 wilayah hutan kota di dalamnya, karena konsep lingkungan bersih itulah UI mulai menggunakan transportasi ramah lingkungan tanpa bahan bakar fosil.

UI Continues Collaboration with BPPT

The screenshot shows a web browser window displaying a news article on the Universitas Indonesia website. The article is titled "UI Lanjutkan Kerja Sama dengan BPPT" and is dated Wednesday, March 13, 2019. The main text of the article states that BPPT (Badan Pengkajian dan Penerapan Teknologi) held a meeting on March 12, 2019, to discuss the 2019 working session. The meeting's theme was "Through Strengthening Institutions, Human Resource Development, and Program Adjustment, We Will Improve the Role of BPPT in RPJM 2020-2024". The article mentions that one of the agenda items was the signing of a Memorandum of Understanding (MoU) and a Cooperation Agreement (PKS) between BPPT and Universitas Indonesia (UI). The signing was officiated by the Rector of UI, Prof. Dr. Ir. Muhammad Anis, M.Met.

Below the text is a photograph of two men shaking hands in front of a banner that reads "Melalui Penguatan Kelembagaan, Pemberdayaan SDM, dan Penajaman Program, Kita Tingkatkan Peranan BPPT dalam RPJM 2020-2024". The date "12 Maret" is also visible on the banner.

On the right side of the article, there is a section titled "Artikel Terbaru" (Latest Articles) with a list of recent news items, including reports on meetings and seminars.

Description:

University's sustainability report is published annually (2018 and 2019). The report consists of all efforts by the university in order to achieve all SDGs. This section presents the report of the last point of the SDGs, Partnerships for the Goals, as part of the annual university's sustainability report.

This section also provides some evidence of the university's action to achieve SDG 17. UI has done numerous collaborations with a lot of parties, including the government. One of the collaborations that are done between UI and the government is written in the Memorandum of Understanding between UI and Transjakarta, officiated during the meeting in Meeting Room A, Administrative Center of Universitas Indonesia (PAUI), Depok, West Java. In the future, Transjakarta buses will be operating inside the UI campus where the students can use it as the Yellow Bus. Therefore, with the Transjakarta buses operating inside the UI campus, it is hoped that it will reduce air pollution as well as overload bus capacity.

Other than Transjakarta, UI also collaborates with BPPT where the MoU and the Cooperation Agreement (PKS) have been signed by the two parties. This collaboration focuses on technology development, as well as downstream development that are suitable for Universitas Indonesia. One of the collaborations done with BPPT is in the bioinformatics field for the Faculty of Public Health (FKM) UI.
