Some activities to support SDG 2: Zero Hunger

#### AFOR I CALL AND THE INTERPRETATION OF THE APPLICATION OF THE APPLICATI

#### **Description:**

University's sustainability report is published annually (2018 and 2019). The report consists of all efforts by the university in order to achieve all SDGs. This section presents the report of the second point of the SDGs, Zero Hunger, as part of the annual university's sustainability report.

This section also provides some evidence of the university's action to achieve SDG 2. The Faculty of Pharmacy (FF) UI has an annual campus forestation program called SPROUT. The program is included in the public service program done by the freshmen of FFUI. Medicinal plants that are cultivated include Kumis Kucing (Orthosiphon Aristatus), Miana (Plectranthus Scutellarioides), Keci Beling (Strobilanthes Crispa), Gandarusa (Justicia Gendarussa) dan Suji (Dracaena). This activity aims forestation in the FFUI campus area and raises freshmen's awareness of their surroundings. It is also hoped that the students of FFUI will know the correct way of cultivating.

The university's attention towards its students is realized through scholarship awards. It is hoped that the scholarship will help UI students with their living cost (book tuition and meal allowance) as college students.
