UI Develops Sign Language to Indonesian Translation Application

Description:

University's sustainability report is published annually (2018 and 2019). The report consists of all efforts by the university in order to achieve all SDGs. This section presents the report of the fifth point of the SDGs, Gender Equality, as part of the annual university's sustainability report.

This section also provides some evidence of the university's action to achieve SDG 5. The main duty and function of Bureau of Public Relations and KIP UI is to publicize the achievements of the academic members of Universitas Indonesia, including the Graduation of UI Students. Universitas Indonesia holds two graduation ceremonies in a year, where in each graduation students who graduate with honors will be announced. All graduates with honors will step into the stage and be broadcasted in TV screens that are located in the venue. These graduates, of course, will get the attention from all the guests as well as the lecturers, deans, and professors.

Achievements obtained by UI students are exposed to the public through the university's homepage (www.ui.ac.id). The bureau does not differ the achievements by its receivers' genders — meaning that all achievements obtained by male and female students are posted equally in a detailed manner.

Dr. Erdefi Rakun, a female researcher and senior lecturer from the Faculty of Computer Science (Fakultas Ilmu Komputer/FASILKOM) UI successfully developed a mobile application that is able to recognize, translate, and transform a motion video of Indonesian Sign Language to Indonesian text.
